

Missouri River Basin – Weekly Update – 16 Oct 2018

Mainstem Reservoir Status:

- ❖ System storage is currently 61.1 MAF, 5.0 MAF above the base of the Annual Flood Control and Multiple Use Zone.
- ❖ Fall public meetings will be held throughout the Basin November 6-8. See our [press release](#) for details regarding times and locations.
- ❖ Over the past 30 days, most of the Basin received above normal precipitation, with some areas of up to 8 inches greater than normal. See lower right quadrant.
- ❖ Gavins Point releases are expected to be about 58,000 cfs for the next 4-6 weeks to continue evacuating the stored flood waters, but will be adjusted if downstream conditions warrant.
- ❖ The Gavins Point release schedule and forecasted Missouri River flows and stages can be found here:
