

Missouri River Basin – Weekly Update – 17 July 2018

Mainstem Reservoir Status:

- ❖ System storage is currently 68.3 MAF, 12.2 MAF above the base of the Annual Flood Control and Multiple Use Zone.
- ❖ More than 25 percent of the 16.3 MAF of designated flood control storage remains available to capture runoff from mountain snowmelt and rainfall runoff.
- ❖ Pool levels for Fort Peck and Garrison reservoirs are in their respective Exclusive Flood Control Zones (EFCZ).
- ❖ System storage appears to have peaked last week at 68.4 MAF.
- ❖ Gavins Point releases are currently 54,000 cfs, and will be increased gradually to 60,000 cfs as downstream conditions permit.
- ❖ The Gavins Point release schedule and forecasted Missouri River flows and stages can be found here:
